C. of C. Meeting

Votes Two - Day Closing In Elba

The Elba Chamber of Commerce held its regular monthly meeting at the Elba Grill Tuesday night, June 19th.

Officers were elected for ensuing year. E. D. Brantley was elected president; Robert Mash, vice president; Duke Tatum, Jr., secretary-treasurer.

Members of the Board of Directors are K. W. Anderson, Sam Sawyer, Jack Vaughan, M. J. Lee and Lamar Rainer Jr.

The merchants committee of the Chamber recommended the closing of business houses on Wednesday, July 4th and Thursday, July 5th. Members present approved the two-day closing.

The Chamber meets the 3rd Tuesday of each month.

Elba Youth Makes Skin Diving Team At Tuscaloosa

Gus Farris of Elba, has been accepted into the Tuscaloosa City Junior Reserve Diving team after having undergone skin diving training and has graduated as an experienced qualified diver in recovery operations of drowned victims.

The rescue team, under the direction of the City Fire Department is employed in the recovery of drowned persons, under water divers and they render their assistance wherever skin divers are needed. Chief Matthews of the City Fire Dept., explains "It is pretty darn in the rivers and lakes and hazards are to be expected, but our boys exhibit professional workmanship."

Farris is a pre-med junior at the University of Alabama and finished his last semester's work with a 2.4 G.P.A. He is also an employee of the Druid City Hospital.

Jehovah's Meeting To Be At Mobile

June 29 - July 1

Hartwell Field, Mobile, has been selected for the largest Southern convention of Jehovah's Witnesses this year, June 29 through July 1.

Announcement of the 3-day gathering which is expected to draw more than 4,000 delegates was made by James Pryor, presiding minister of the local New Brockton congregation.

The courageous minister assembly will be sponsored by the Watchtower Bible and Tract Society of New York, and one of 58 assemblies to be held in the United States and Canada this summer. Eight other assemblies will be held in the British Isles. All members of the New Brockton congregation are planning to attend this three days of advanced training and Bible instructions.

After two days of good food and lots of fun, the 4-Hers broke camp Wednesday morning after winners were announced.

Kennedy - Freeman Farm Bill Defeated By House Vote

The following is a statement by J. D. Hays, president of Alabama Farm Bureau Federation.

We are pleased that the House defeated H. R. 11222, the Kennedy - Freeman Farm Bill.

All of Alabama's Congressmen and Senators voted solidly for passage of the bill and in so doing, indicated their willingness to sell Alabama farmers and agriculturalists "down the river" even as they protested by the thousands through telegrams, letters, and telephone calls against passage. Mississippi's Congressmen voted against the bill 5 to 1, and all southern states recorded opposition except Alabama, Georgia, North Carolina and Arkansas.

Seven Democratic votes cast against the bi-partisan farm were from the South.

Never before have farmers and related business groups been more solid on any issue. The bill was opposed by Alabama Farm Bureau Federation, Alabama Cattlemen's Association, dairymen, poultry producers and other groups including agricultural equipment dealers, bankers, seedmen, fertilizer dealers, and other business partners in agriculture.

The Farm Bill is not and should not be a partisan issue. The farm surplus situation is an economic problem and should be handled in a non-partisan manner. We are a one-party state in Alabama and we have the right to expect our delegation in Washington to represent us in our efforts toward Alabama's continued agricultural growth and improvement, in preference to partisan political viewpoints.

The issue is not conclusive. See Farm Bill Page 5.

Medical Assoc. To Honor Member At Chicago Meet

Mrs. William G. Thins, Sr. of Birmingham was installed as president of the Women's Auxiliary to the American Medical Association today in Chicago.

Mrs. Thins brings this honor to Alabama for the second time in the national organization's history. The late Mrs. Saele Harris of Birmingham served as president of the Auxiliary 37 years ago.

"Aim for Excellence in Achievements" was the theme selected by Mrs. Thins as the Auxiliary's goal during her year as president.

The Medical Association of the State of Alabama and its Auxiliary will honor Mrs. Thins this evening with a reception at the Pick Hotel in Chicago. Over 300 guests are expected at the reception where Mrs. Thins will receive a navy blue chiffon dress.

Mrs. M. Vanna Adams, wife of the president of the Medical Association of the State of Alabama, is chairman of the reception plans and officiating hostess. Alabama Auxiliary officers and delegates who will assist in the reception include Mrs. Len Burroughs, of Birmingham; Mrs. John Krumrey, of Tuscaloosa; Mrs. Ira Patton, of Oneonta; Mrs. Bryce Robinson, of Birmingham; and Mrs. E. V. Caldwell, of Huntsville.

The Ladies Softball League is getting off to a slow start. Only a few ladies have responded. Any ladies 18 and up that are interested in playing, please telephone 7-6128.

Pony League was named coach of the team that was.

Elba Guardsmen Attend Two-Week Encampment

Fort McClellan

Officials Welcome

Dixie Div. To Post

Cyclists - Motorists Urged To Observe Safety Rules Listed

Monday morning the 4,000 men of the Alabama part of the 31 Infantry Dixie Division.

The main reason for the two weeks is to train as individuals and as parts of the units to produce greater efficiency and a greater strength for national security against communist aggression.

The troops were first greeted by American M. A. Y. O. George T. Morris and Mr. Marshall K. Hunter, chairman of the Third U.S. Army Military Affairs Committee. Both men extended a warm welcome to the Division on behalf of the entire Alabama community. The same sincere greeting came from Col. L. Smith, commanding officer of Fort McClellan, who spoke on behalf of all the post personnel.

State Adj. Gen. Eric Gen. Henry V. Graham, assistant Division Commander and a

General Langan told the officers and men of the Division that each of them had an opportunity "for personal growth in mind, body, and spirit during the encampment." He added encouragement to give 100 percent of his best to achieve this growth.

He outlined these rules in his final words the General maintained that all the men of the 31st should make the sacrifice of active duty will, saying that "no sacrifice is too great to preserve freedom."

During the recent Shelter Survey conducted in Coffee County by an Architect-Business firm under contract with the Corps of Engineers, United States Army, New Britain, Conn., a total of eleven buildings were checked in Coffee County that would accommodate at least fifty people.

The first result of the survey has been revealed today by Shirley L. Carpenter, Director, Coordinator, Coffee County Civil Defense, and reflects that much is yet to be done to provide adequate public shelter in Coffee County to protect the people from radioactive fallout.

Mr. Carpenter stated that the figures released by the Corps of Engineers did not include any shelter facilities that accommodated less than fifty people, any family type or commercial shelters for small groups, or caves and mines, all of which provide considerable shelter space where existing, nature and wildlife management are available to the boys who are interested.

Camper, according to their rank, will work in the various areas, depending on the requirements they need to complete the rank they are working toward. Campers were welcomed after supper services which were held in the Laneside chapel Sunday night. The troops in camp will complete against each other in camp-wide games one night this week.

The climax of camp will be reached Friday night when a campfire conducted by the Order of the Arrow dance team will perform and be approved. Shelter spaces available in these buildings will be determined under Phase II, now underway, and will be revealed within a reasonable period of time.

Refrigerate cooking and salad oils for long storage periods. If they turn cloudy or sooty, no harm is done, just let them reach room temperature before using.

POOR ORIGINAL

RAMBLING ROSES AND FLYING BRICKS

By EARL TUCKER

Everybody should have some one who will listen attentively to all the little details of their aches and pains. Such a person is powerful hard to find and once you find one, stay with him. There is nothing worse than spending a hour telling somebody all about your ailments, knowing all the time that they aren't really listening. You might as well be telling your troubles to a post or tree for all the good it's doing.

I'm a pretty good listener, although when I listen I do require equal time to discuss the many varied and sundry ailments I'm suffering from. An expert complainer understands this.

I have a companion here in my town that I generally meet with one day a week for a couple of hours and we sort of rehash our aches and pains. I've seen him get pretty badly hurt, but he won't come up with something new every now and then, but he has a lot of imagination and hardly a week passes but what he thinks of something new and different.

We have just about worn out such things as corns, bunions, arthritis, back pains, aches, foot, indigestion, inability to sleep, spots before the eyes, and sinking spells. Last week he came up with a dilly. He thinks he has an up-side-down stomach and he's getting a lot of enjoyment out of it. I suggested maybe he should see a doctor and have some X-rays made, but that's where I said the wrong thing. People who get so much pleasure out of their ailments should never see a doctor on account of they might get cured, which would give them some kind of inferiority complex and might ruin their entire lives.

It's amazing, though, how many people are downright rude when you start giving them little details about your various aches and pains. You might not believe this, but there are people who will actually walk away right when you're in the middle of a very interesting and unusual type of headache or a play-by-play account of how you suffer from rheumatoid condition on damp days.

The only thing worse than a fellow who refuses to listen to a person's ailments is one who has a cure for everything. They always have a prescription who had the same trouble thirty years ago and what he did was to take some molasses mixed with sulphur and he hasn't been bothered with it since. Regardless of what you come up with to cure it, he's going to do it. What I'm going to do is to get my friend with the up-side-down stomach to talk with him. I'll bet you four-bits that molasses and sulphur won't cure it, but I'll bet another four-bits that he never has had a great-uncle who had the same trouble.

Then there is the person who has a stereotyped lecture to give every time I mention an ailment. He starts off by saying that a person's body is very much like an automobile and the lecture runs for thirty minutes. He says that a man's stomach is like a gas tank on a car. If we put the wrong kind of fuel in it you're bound to have trouble with the motor. He says the air-filter on a car is similar to the lungs and when the air-filter gets clogged up with dust and dirt and foreign matter, the mind is bound to crack up. Then he goes on to say as how a car is capable of high speeds, but that if we drive a car for a hundred miles an hour for an entire day it's going to start knocking and rattling and pretty soon it's going to be ready for the junkyard. Although he hasn't said so, I reckon if you put the motor in upside down you would have the equivalent of an up-side-down stomach. Think I'll mention this to him. It might keep him confused for a few days.

I think, though, I'm going to drop from my list of complaining friends the fellow who has the displaced stomach. It's hard to get excited over a minor ache or pain when you're bound to complete with something like that. Maybe if I suggested that he stand on his head, he might drop me from his list. That remedy probably wouldn't cure his condition but it would certainly improve his digestion.

School Tax On Real Property Defeated In Co. and Enterprise

Elba Favors New Tax In City; 182 For, 137 Against

Supt. Max Bowden Says Progress Is Being Made Here

The Elba Schools will receive a 5-mill increase on tax valuation in last Tuesday's special election.

The special election was whether Coffee County would levy, in School District E of the County on ad valorem tax in addition to all other taxes, at the rate of 50c on each \$100 of taxable property in the school district as such property was assessed for State taxation for the preceding year, which levy shall be made for a period of twenty five consecutive years, commencing with the tax year beginning October 1, 1961, for which levy the tax shall become payable on October 1, 1962, and continuing until the year ending September 30, 1986, the proceeds of which tax shall be exclusive for education purposes.

The Elba City School Board of Education is making rapid strides toward furnishing adequate housing for all school children in its system.

The new Elba Colored High School, being built by Riley Stabler Construction Company of Greenville, is more than 15 percent complete as of the beginning of last week. This \$100,000 building, containing 14,000 square feet of floor space should be ready for occupancy by September 15, according to the construction foreman.

With the awarding of the contract for the Colored High School, the systems of the school board have until additional revenue could be obtained.

Desperate needs of the schools include the re-working of restrooms and classrooms and a new high school building for the cost of \$350,000. reworking the elementary classrooms and a new gymnasium—auditorium for the colored children at an approximate cost of \$135,000. Simple additions would require funds of almost one-half million dollars. The only way this work could be done is to give every time I mention an ailment. He starts off by saying that a person's body is very much like an automobile and the lecture runs for thirty minutes. He says that a man's stomach is like a gas tank on a car. If we put the wrong kind of fuel in it you're bound to have trouble with the motor. He says the air-filter on a car is similar to the lungs and when the air-filter gets clogged up with dust and dirt and foreign matter, the mind is bound to crack up. Then he goes on to say as how a car is capable of high speeds, but that if we drive a car for a hundred miles an hour for an entire day it's going to start knocking and rattling and pretty soon it's going to be ready for the junkyard. Although he hasn't said so, I reckon if you put the motor in upside down you would have the equivalent of an up-side-down stomach. Think I'll mention this to him. It might keep him confused for a few days.

I think, though, I'm going to drop from my list of complaining friends the fellow who has the displaced stomach. It's hard to get excited over a minor ache or pain when you're bound to complete with something like that. Maybe if I suggested that he stand on his head, he might drop me from his list. That remedy probably wouldn't cure his condition but it would certainly improve his digestion.

That remedy probably wouldn't cure his condition but it would certainly improve his digestion.

Martin Resigns Job To Begin Campaign For U. S. Senate

James D. Martin, candidate for the U. S. Senate on the Republican ticket in Alabama, has resigned as president of the Associated Industries of Alabama to begin his statewide campaign which he promises to be one of the most active in the state's history.

In a statement to the A. I. A. board of directors, Martin said, "A. I. A. is an organization devoted to improving Alabama's economy, increasing her industrial growth and providing greater job opportunities throughout the state. My job as president of this distinguished organization has been most satisfying, and I leave it to a most vital and invigorating job ahead."

For proposed taxation 182 votes—against proposed taxation 137 votes. The approval of the special tax is for a duration of 25 consecutive years until September 30, 1986. The proceeds from this tax will be used exclusively for education purposes in the City of Elba.

The official results of the special election of whether Coffee County would approve a levy in School District E of the County on ad valorem tax in addition to all other taxes at the rate of 50c on each \$100 of taxable property, the same terms as that of the above, Elba District E.

For School District 1—for the proposed taxation 422 votes approved and 343 votes against the proposed taxation.

In School District 15—City of Enterprise, the same suggested ad valorem tax as that of District E, and District E was defeated, 280 votes approved, that special school tax and 442 voted against that taxation.

New appointments to the Elba High faculty are: Mrs. Paul Prell, English; Miss Sylvia Jones, Latin; Gerald Stirling, Mathematics; Mrs. Ruth Hawkins, First Grade; and Mrs. Teresa Rowell, who will teach Fourth grade instead of Mr. Jack Brunson. Brunson has been named as successor to Mr. Shelby Morrow on the City Board of Education.

Members of the City of Elba Board of Education are: E. C. Brooks, chairman; H. J. Harold, W. H. Taylor, W. R. Fuller and Charles Mallory.

Always use low, moderate temperatures when cooking eggs.

After completing what Mr. Max Bowden, City Superintendent, term, of highly successful academic year plans are being formulated for a much better instructional program for 1962-63. Some changes include adding French, Mechanical Drawing, Family Life, and an expanded Commercial Education Program in the Elba High School.

Mr. Lamar Foley, high

YOUR HEALTH

From Medical Association of The State of Alabama

APPENDICITIS

The death rate from appendicitis has been reduced about 90 per cent in the past 20 years. In the age group of 1 to 34 years, the reduction in that period has been 96 per cent. A major factor in this reduction has been the control of peritonitis and other infections through the use of antibiotics and improved surgical procedures.

A national survey reported that about 417,000 persons in the United States were admitted to short-stay hospitals in a recent year on account of appendicitis. Of these, 336,000, or nearly 80 per cent, were treated surgically. Despite the great gains made in the control of appendicitis deaths, the disease is still a medical problem.

The average hospital stay today for an appendicitis case is just under seven days for surgical cases and a bit over four for non-surgical cases. This runs to a total of 2,710,000 days annually. Consider comparatively the cost in time of appendicitis cases 50 years ago when it required normally a three weeks hospital stay.

Young adults are the most frequent victims of appendicitis. First there is pain in the middle of the abdomen, followed by moderate nausea with perhaps some vomiting. Soon after, there is increasing soreness in the lower right portion of the abdomen.

If an operation is diagnosed, as necessary within a day or two after confirmation of the first symptoms, the chances of recovery are excellent. The sooner the appendix is removed, the better the results. Don't delay when appendicitis symptoms occur. See your doctor.

Steel Foundation Backs Education

Mr. A. V. Wiebel (left), president of TCI Division, presents a check of \$7,000.00 to Dr. Leslie S. Wright, president of the Alabama Association of Independent Colleges. The check represents the member colleges' share in the 1962 United States Steel Foundation grants to higher education. In presenting the check, Mr. Wiebel stated "one of the most encouraging aspects of our economy today, is the willingness of corporate business to assume its responsibility for the continuation of privately supported colleges which are so important to our society. United States Steel Foundation is glad to be a part of this program." The member colleges of this Association are: Athens, Birmingham-South, Howard, Huntingdon, Judson, St. Bernard, and Spring Hill.

Extreme Caution Urged In The Use Of Insecticides

Nearly everyone, the housewife, gardener, and homeowner, uses insecticides. And, without the help of insecticides, many fruits, vegetables and household furnishings would be destroyed by pests in a short time.

If an operation is diagnosed, as necessary within a day or two after confirmation of the first symptoms, the chances of recovery are excellent. The sooner the appendix is removed, the better the results. Don't delay when appendicitis symptoms occur. See your doctor.

FROZEN FOODS

As the summer days go by I see more and more home-makers freezing vegetables. I do hope that you will follow these suggestions in your freezing program.

Not all frozen foods will keep the same length of time in the home freezer. You'll find it helpful not only to label your packages clearly with contents and date frozen, but to keep a list at a glance check list of the storage time limits of your frozen items. Here are a few:

Fruits and vegetables, about 12 months.

Beef, veal, lamb, poultry, about 6 months.

Cooked meats, vegetables, desserts and salads, about 3 months.

The longer a food is frozen the more likely it will lose some of its characteristic flavor, color and texture.

Foods kept longer sometimes develop a flavor, off-color or texture which is not characteristic of that food so be a calendar watcher!

All frozen foods need to be frozen and stored at 0 degrees or below. Zero degrees is the critical temperature. Food frozen above zero is not as good. It can lose some of its color, flavor and characteristic texture.

Put a thermometer in the basket of your freezer and see what temperature you have. If it is above zero degrees, it should be regulated. Some home freezers can be regulated without having a service man come, but you cannot. Read your User's Manual which came with your freezer. For a twenty cubic foot freezer, do not put more than 40 to 60 pounds or 100 quarts of unfrozen food in it at one time. Wait 24 hours before putting in more food.

SURFACE UTENSILS

Even though the utensils in the average modern kitchen are adequate, you will need to look at the following points if you are getting the most from them.

First, flat bottom utensils

Second, straight sides correspond with the size of the cooking unit. If the utensil is too small for the unit, heat is wasted if it's too large it may transfer too much heat to the metal

Third, utensil size should correspond with the size of the cooking unit. If the utensil is too small for the unit, heat is wasted if it's too large it may transfer too much heat to the metal

Fourth, utensil size should correspond with the size of the cooking unit. If the utensil is too small for the unit, heat is wasted if it's too large it may transfer too much heat to the metal

Fifth, utensil size should correspond with the size of the cooking unit. If the utensil is too small for the unit, heat is wasted if it's too large it may transfer too much heat to the metal

Sixth, utensil size should correspond with the size of the cooking unit. If the utensil is too small for the unit, heat is wasted if it's too large it may transfer too much heat to the metal

Seventh, utensil size should correspond with the size of the cooking unit. If the utensil is too small for the unit, heat is wasted if it's too large it may transfer too much heat to the metal

Eighth, utensil size should correspond with the size of the cooking unit. If the utensil is too small for the unit, heat is wasted if it's too large it may transfer too much heat to the metal

Ninth, utensil size should correspond with the size of the cooking unit. If the utensil is too small for the unit, heat is wasted if it's too large it may transfer too much heat to the metal

Tenth, utensil size should correspond with the size of the cooking unit. If the utensil is too small for the unit, heat is wasted if it's too large it may transfer too much heat to the metal

Eleventh, utensil size should correspond with the size of the cooking unit. If the utensil is too small for the unit, heat is wasted if it's too large it may transfer too much heat to the metal

Twelfth, utensil size should correspond with the size of the cooking unit. If the utensil is too small for the unit, heat is wasted if it's too large it may transfer too much heat to the metal

Thirteenth, utensil size should correspond with the size of the cooking unit. If the utensil is too small for the unit, heat is wasted if it's too large it may transfer too much heat to the metal

Fourteenth, utensil size should correspond with the size of the cooking unit. If the utensil is too small for the unit, heat is wasted if it's too large it may transfer too much heat to the metal

Fifteenth, utensil size should correspond with the size of the cooking unit. If the utensil is too small for the unit, heat is wasted if it's too large it may transfer too much heat to the metal

Sixteenth, utensil size should correspond with the size of the cooking unit. If the utensil is too small for the unit, heat is wasted if it's too large it may transfer too much heat to the metal

Seventeenth, utensil size should correspond with the size of the cooking unit. If the utensil is too small for the unit, heat is wasted if it's too large it may transfer too much heat to the metal

Eighteenth, utensil size should correspond with the size of the cooking unit. If the utensil is too small for the unit, heat is wasted if it's too large it may transfer too much heat to the metal

Nineteenth, utensil size should correspond with the size of the cooking unit. If the utensil is too small for the unit, heat is wasted if it's too large it may transfer too much heat to the metal

Twentieth, utensil size should correspond with the size of the cooking unit. If the utensil is too small for the unit, heat is wasted if it's too large it may transfer too much heat to the metal

Twenty-first, utensil size should correspond with the size of the cooking unit. If the utensil is too small for the unit, heat is wasted if it's too large it may transfer too much heat to the metal

Twenty-second, utensil size should correspond with the size of the cooking unit. If the utensil is too small for the unit, heat is wasted if it's too large it may transfer too much heat to the metal

Twenty-third, utensil size should correspond with the size of the cooking unit. If the utensil is too small for the unit, heat is wasted if it's too large it may transfer too much heat to the metal

Twenty-fourth, utensil size should correspond with the size of the cooking unit. If the utensil is too small for the unit, heat is wasted if it's too large it may transfer too much heat to the metal

Twenty-fifth, utensil size should correspond with the size of the cooking unit. If the utensil is too small for the unit, heat is wasted if it's too large it may transfer too much heat to the metal

Twenty-sixth, utensil size should correspond with the size of the cooking unit. If the utensil is too small for the unit, heat is wasted if it's too large it may transfer too much heat to the metal

Twenty-seventh, utensil size should correspond with the size of the cooking unit. If the utensil is too small for the unit, heat is wasted if it's too large it may transfer too much heat to the metal

Twenty-eighth, utensil size should correspond with the size of the cooking unit. If the utensil is too small for the unit, heat is wasted if it's too large it may transfer too much heat to the metal

Twenty-ninth, utensil size should correspond with the size of the cooking unit. If the utensil is too small for the unit, heat is wasted if it's too large it may transfer too much heat to the metal

Fish Pond Tips Is Outlined By Auburn Specialist

Fish ponds can't be weighed, but they can, and need to be balanced.

How so? Earl F. Kennamer, Auburn Extension Service fish and wildlife specialist, explains.

"To be balanced, ponds need two kinds of fish: forage fish, those that feed mainly on plants, and piscivorous fish, those that feed mostly on other fish. Bluegills and shiner cracker are examples of forage fish. The largemouth bass are piscivorous.

"If a pond doesn't have this balance between plant-eating and fish-eating fish, it's lagging behind."

Kennamer says that a ratio of about 1,000 bluegills for every 100 bass is "the right balance. There are a few important tips to remember in balancing a fish pond, states Kennamer. For one thing, it shouldn't be stocked above the proper ratio mentioned above. About 100 bass and 500 bluegills are recommended if the pond won't be fertilized.

"It's also a good idea to throw back all unwanted bass less than 12 inches long," says the specialist, "but don't fish your pond until June 1 of the next year after bass are stocked."
